# To the right worshipfull Syr Thomas Chaloner knight, and clerke of the kynges maiesties prime Counsayle.

Albeit right worshipful, that thys my treatise is bothe to vyle and base to bee set foorth vnder your protection, beyng worthely estéemed of all men, to be as well learned wyse and vertuouse, as any gentleman in this realme, notwithstanding vpon hope of the humanitee and gentlenesse, whiche is euer incident to persons of suche woorthie qualitees, I am at this present bolde, hauing no acquaintance with your maistership, to dedicate these my rude collections vnto you, praying you to accepte it as a thynge written by me to induce chyldren to the latine tonge, not moued therto with the desyre of vayne glory but with a feruente affection and loue I beare vnto my countrey. For accordynge to the sayinge of the deuine philosopher Plato. We are not borne onely for our owne commoditie, but partly our parentes, partly our frendes, and partly our countrey, both clayme a certayne dewtie of vs, whiche thyng made Codrus kynge of Athens, Curtius and Decius Romayne knightes, also Zopirus the noble person, with diuers others to iopard their liues for the sauegard of their countreis, which examples of Infidels were sufficient to reproue me, if I should refuse to take a little peyne for the profyte of the publyke wealthe, and specially to preserue the tender youthe thereof from the infection of barbarousnesse, whiche therewith will bee sone corrupte, not possible of longe tyme to bee reformed.

For as Horace bothe witnesse, the potte will longe sauour of the lycour wherewith it is seasoned. Also the fynest colours will soonest be staygned, neither can they be so sone purified and made cleane agayne. These thynges considered, I haue resorted to the most famous and ancient authours, out of the

whiche as out of cleare fountaynes I haue drawen as dilygentlye as I coulde, the proper names of thynges conteyned vnder one kynde, and disposed them in suche ordre, that a very childe beyng able to reade, may with litle labour perfitely imprinte them in memory: Whiche shall not be onely profitable for them nowe in their tender age, but hereafter when they shalbe of more iudgement and yeres, it shalbe vnto them a singular treasure: for the lacke whereof they shalbe compelled, as I haue herde many profounde clerkes bothe in disputacion as also in familiar communicacion to vse in the stede of the proper and naturall woorde, a paraphrase or circumlocucion. Nowe if in the translatyng, or in the englishyng of these woordes I haue erred, as I can not but so doo in so weighty a mattier, or if I haue omitted any thynge, as I haue done many purposely, because diuers greate learned men can not agree vpon them, I humbly submitte my selfe to your mayesterhippes correccion, whome I knowe to bee excellentlye well learned bothe in the Greeke and in the Latine, prayinge you hereafter, whan occasion shall serue, to put your helpynge handes to the finishynge of this little booke, whiche if you doo by the exaumple of syr Thomas Elyote that woorthy knyghte, you shall not onely bynde all that be studious to praye for you, but also purchase to your selfe immortall fame and honour, whiche I pray God sende you, with longe lyfe to his pleasure.
